

Dedicated to Deploying Innovative Wireless Communications To Transform Your Business

Dominion Networks: Central Texas' Premier Private Wireless Network Provider

At Dominion Networks, we're not just experts; we're innovators in the field of wireless connectivity. We craft private wireless networks tailored for a diverse array of applications, ensuring you stay connected when and where it matters most.

We ensure secure, mission-critical access essential for machines and robust broadband communications. We work with many industries, including;

Public Safety: Enhancing communication for first responders and emergency services.

- **Sports Facilities:** Providing uninterrupted coverage for both operations and fan engagement.
- **Healthcare:** Ensuring reliable, secure connections for medical devices and patient care.

- **Agriculture:** Empowering modern farming with IoT and data-driven solutions.
- **Distribution:** Streamlining logistics through efficient inventory tracking and management systems
- **Manufacturing:** Optimizing production lines with real-time data transmissions and machine connectivity.
- **And more** – wherever there's a need for top-tier wireless networks, we're there .

At Dominion Networks, we believe that our job doesn't end at delivering highly secure, affordable, and reliable technology; it actually begins there. We understand that the true measure of our success is reflected in the success of your operations. That's why we've developed a customer-centered support model, tailored to ensure needs are not just met, but anticipated.

Keeping Pace with the Industry 4.0 Revolution

In the era of Industry 4.0, the network has rapidly evolved to meet the demands of modern business. This revolution has elevated connectivity requirements to unprecedented heights, introducing advanced machine-to-machine communications, the Internet of Things (IoT), robotics, and expansive broadband capacities. Key innovations now include edge computing and AI integration at the edge. Breakthroughs in wireless technologies, such as **CBRS (Citizens Broadband Radio Service) and 5G**, have significantly expanded the capabilities of the wireless spectrum to support this transformative phase.

Dominion Networks: Pioneering in Texas

At Dominion Networks, we are at the forefront of this technological revolution in Texas. We seamlessly integrate these cutting-edge technologies to deliver world-class systems, empowering businesses to achieve more. Our offerings span from Private LTE and Private 5G to SASE (Secure Access Service Edge) and the revolutionary Rajant Kinetic Mesh. We partner with companies that share our commitment to excellence and a customer-first approach, ensuring top-tier solutions for your business needs.

Redefining Wireless Connectivity.

The inception of Dominion Networks was driven by the emerging potential of small cell private RAN (Radio Access Network) networks. The advent of LTE and 5G marked a paradigm shift in wireless coverage capabilities, particularly for large spaces. The traditional model of deploying Wireless Access Points for extensive coverage became increasingly costly and complex. Today's networks are a hybrid architecture, combining these technologies to create a robust infrastructure that meets the dynamic demands for data access. In a world where automation and IoT are essential for efficiency, our network infrastructure provides the necessary support.

Network Connectivity and Beyond

Our product portfolio extends far beyond mere network connectivity. We utilize the best-in-class GPS asset tracking solutions, partnering with Inseego to offer unparalleled visibility of all your assets. Whether it's heavy-duty equipment on a job site or trucks on the highway, Inseego's leadership in 5G and GPS systems for both powered and non-powered assets enhances our offerings. The IoT ecosystem demands a robust suite of network technologies to realize its full potential. Our network solutions and comprehensive IoT product suite are designed to meet the diverse requirements of various industry verticals, providing the critical infrastructure necessary for this vital investment.

Prioritizing Data Protection with Advanced Solutions

In today's digital landscape, prioritizing data protection is not just a necessity but a crucial business responsibility. As network technologies advance, not only do they expand in capacity and performance, but they also evolve in their cybersecurity capabilities.

At Dominion Networks, we understand the critical importance of safeguarding data. That's why our solutions are at the forefront of cybersecurity technology. We utilize the inherent encryption capabilities of 5G, which provide a robust foundation for secure data transmission. Additionally, our implementation of SASE (Secure Access Service Edge) adheres to the zero-trust model, ensuring stringent security protocols for network access and data protection.

Our commitment to cybersecurity is further exemplified by our partnership with Rajant, offering military-grade encryption for uncompromised data security. This level of encryption is essential in today's environment, where data vulnerabilities can have significant consequences. Our engineers and system designers specialize in customizing security solutions. We tailor our security options to meet the most rigorous and sensitive data communication requirements. Whether your business operates in a highly regulated industry or handles sensitive information,

Our Partnership With Rajant: Elevating Your Business Connectivity.

Rajant Corporation: Innovators in Wireless Networking

Our partnership with Rajant Corporation, a renowned American manufacturer of wireless network equipment, signifies a significant win for your business. Rajant is acclaimed for its award-winning Rajant Breadcrumb suite of products, which offers unparalleled connectivity through its patented Kinetic Mesh technology. This groundbreaking technology forms a dynamic Layer 2 mesh network, renowned for its resilience and efficiency, especially in challenging environments.

The Rajant Breadcrumb Advantage

The Rajant Breadcrumb is not just a product; it's a solution crafted for adaptability and reliability. With various capacities and radio configurations available, it is designed to meet the most demanding requirements for mission-critical connectivity. Whether you're operating in industrial settings, rugged terrains, or dynamic environments, the Breadcrumb ensures consistent and reliable network performance.

Expertise and Customization with Dominion Networks

At Dominion Networks, we take pride in having Rajant Certified Network Professionals (RCNP) on our team. Our experts are not just skilled in deploying this advanced technology; they are adept at tailoring it to fit your specific needs. We understand that each business scenario is unique, and our approach is to plan and implement a network solution that aligns perfectly with your operational demands.

With Dominion Networks and Rajant, you gain access to a partnership that brings cutting-edge wireless networking technology to

Inseego: Unlocking the True Potential of 5G for Businesses

Beyond the Buzz: Realizing 5G's Business Value

While 5G technology has become a buzzword recently, often linked more with consumer smartphones and public providers, its real potential in the business world is just beginning to unfold. The key to harnessing this potential lies in innovative products and solutions, an area where Inseego truly excels. Inseego manufactures a range of 5G Fixed Wireless Access devices that are not only easy to set up but also to manage. We have chosen Inseego as one of our primary strategic partners due to their cutting-edge 5G products, which are specifically designed to deliver the value that we see our customers need.

Pioneers in 5G Solutions

Inseego is at the forefront of the 5G revolution, developing products that transcend the typical consumer-focused narrative. Their solutions are designed to demonstrate the clear, tangible benefits of 5G technology in a business context. This isn't just about faster speeds or improved connectivity; it's about leveraging 5G to transform how businesses operate, communicate, and grow.

Tailored 5G Solutions for Your Business Needs

In partnership with Inseego, we at Dominion Networks are committed to helping companies realize the full spectrum of advantages that 5G offers. Whether it's enhancing operational efficiency, enabling real-time data analytics, or facilitating seamless communication, Inseego's product line is tailored to meet the diverse and evolving needs of modern businesses.

With our expertise and Inseego's innovative 5G solutions, we're here to ensure that your business doesn't just adapt to the 5G era but thrives in it.

Discover the Power of Private Wireless Networking with Dominion Networks! Elevate your business with our state-of-the-art network solutions, tailored to meet the unique demands of today's dynamic digital landscape. From robust cybersecurity to unparalleled connectivity, our services are designed to propel your enterprise forward. Don't miss out on the technological revolution. Contact Dominion Networks now to unlock the full potential of your business operations. Let us be your partner in navigating the future of digital communication. Act today and transform your network experience
